

# WEYERHAEUSER LUMBER: FOR ALL THE RIGHT REASONS

- QUALITY—YOU DEPEND ON
- RELIABILITY—YOU COUNT ON
- CONSISTENCY—YOU CAN BUILD ON

## WE'RE WITH YOU

Much has changed since Weyerhaeuser began over a century ago. With innovations that have set the standard for the industry, we've steadily raised the bar on quality-control and manufacturing efficiency as well as the health and sustainability of our forests.

But there's one thing that hasn't changed—our devotion to customer service.

You can count on us to earn your business as we always have—one order at a time—by working hard to deliver the consistency and reliability that are so essential to your success.

## WE'VE GOT IT

Weyerhaeuser has long supported sustainable forest stewardship. By maintaining ownership of our forests, we are able to control, integrate, and continually improve the entire supply-chain process—from seedling through product delivery.

Our network of North American forests and strategically located mills allow us to offer all of the major softwood species—Southern pine, Douglas fir, Hem-fir, and SPF (spruce-pine-fir)—in a broad range of widths, lengths, and grades.

 SUSTAINABLE FORESTRY INITIATIVE

100% of Weyerhaeuser timberlands in North America are SFI or CSA certified.

Innovative technology helps create a consistent and reliable product.

Cutting-edge manufacturing techniques help reduce waste.

## WE'RE ON IT

Quality checks throughout the milling process are enforced by dedicated, highly trained quality-control specialists. Our extensive manufacturing experience helps minimize waste at both mill and job site while ensuring a uniform grading process across all mills.

Technology plays a huge role. Innovations made by Weyerhaeuser in computer-assisted grading, optimized manufacturing, process control, and kiln-drying have done much to help ensure a reliable and superior product.

We're keenly aware that getting the right product at the right time is crucial to your success. That's why we're hard at work developing and refining the processes and technologies that will continue to ensure your satisfaction.

Quality-control checks occur throughout the manufacturing process.

Our distribution network delivers the product when and where it's needed.

## THE FUTURE

We've accomplished a lot, but we're really just getting started. To meet your growing needs, Weyerhaeuser, Trus Joist, and Strukturwood were consolidated to form iLevel.

iLevel represents a seismic shift not only in how homes will be built, but also in how dealers, designers, and builders will work together.

We're excited by the promise of iLevel systems and solutions to transform the industry by taking performance, profitability, value, quality, and distinction to an all-new level—iLevel.

The sustainable forestry cycle begins with planting.

Our knowledgeable and experienced service organization lets you more effectively meet the needs of your customers.

From seedling to structure, we ensure a reliable and consistent product.
