100% KDHT, S4S  
2x4-2x12  
Lengths to 20'  
(MSR pulled in 2x6-2x12)

## GULF SOUTH REGION MILLS

### **BOGALUSA, LA - SPIB 386**

100% KD-HT, S4S  
2x4-2x8, 1x4 Rgh Grn  
Lengths to 20'

### **BRUCE, MS - SPIB 409**

100% KD-HT, S4S  
2x4-2x12  
Lengths to 20'  
(MEL pulled in 2x6-2x10, Sel Str pulled in 2x4)

### **HOLDEN, LA - SPIB 62**

100% KD-HT, S4S  
2x4, 4x4  
Lengths - PET and 8'

### **MCCOMB, MS - SPIB 63**

100% KD-HT, S4S  
2x4-2x12  
Lengths to 20'  
(MSR pulled in 2x4-2x12)

### **MILLPORT, AL - SPIB 277**

100% KD-HT, S4S  
2x4, 1x4 Rgh Grn  
Lengths - PET and 8'

### **PHILADELPHIA, MS - SPIB 400**

100% KD-HT, S4S  
2x4-2x12  
Lengths to 20'  
(Sel Str pulled in 2x4)

### **SILVER CREEK, MS - SPIB 384**

100% KD-HT, S4S  
2x4-2x8, 1x4 Rgh Grn  
Lengths to 20'

## MID SOUTH REGION MILLS

### **DIERKS, AR - SPIB 72**

100% KD-HT, S4S  
2x4-2x12  
Lengths to 20'  
(MEL pulled in 2x6-2x12)

### **DODSON, LA - SPIB 163**

100% KD-HT, S4S  
2x4-2x12  
Lengths to 20'  
(MSR pulled in 2x4-2x8)

### **IDABEL, OK - SPIB 286**

100% KD-HT, S4S  
2x4-2x10  
Lengths to 20'

## SOUTHERN PINE

Southern pine is a general term for several pine species that grow in a band across the southern United States from east Texas to Virginia. Its lumber has very high strength, stiffness and nail-holding capabilities and has a unique cellular structure that helps it readily accept preservative treatments. Southern Pine is highly resistant to wear, making it suitable for decks, patios, marinas, boardwalks and other high-traffic applications, especially after treatment with a preservative.

Due to its strength and stiffness, Southern pine is used for framing in single- and multi-family housing and in commercial buildings. It is also used for floor joists, wall panels, roof trusses and stair components.
