

New from iLevel

WHO SAYS YOU CAN'T IMPROVE ON A CLASSIC?

iLEVEL HAS TAKEN WOOD QUALITY TO A WHOLE NEW LEVEL

iLevel® Performance-Tested Framer Series® Lumber

iLevel® has taken America's favorite framing material to a whole new level of quality and reliability. Forget about guesswork. Forget about callbacks down the road. With iLevel Framer Series lumber, you finally know how today's lumber will look and perform six months from now. Our patented computerized grading system—the result of 10 years in testing—goes far beyond visual grading capabilities to ensure that every piece starts straight and stays straight. We even mark each board crown to eliminate guesswork on the jobsite. It's all about using the right product for the right application, maximizing your labor, your budget, and your stellar reputation.

- Precision tested for fiber strength and density
- Computerized grading virtually eliminates warp
- Ideally suited for precision applications
- An arrow on every board clearly indicates the direction of the crown
- Comes from SFI-certified mills and timberlands
- Treated with Factory-Applied Mold Inhibitor

KEEP YOUR CREWS BUSY FRAMING— NOT CULLING

We all know that time is money, and nobody wants to spend valuable jobsite time culling and sorting. Every piece of iLevel Framer Series lumber has already been graded above and beyond industry standards, so you can be sure of what you're getting. That consistency and stability saves time for your crews, cuts down on jobsite waste, and streamlines installation.

And speaking of time, nobody wants to wait around for out-of-stock product, either. iLevel Framer Series lumber is readily available in the standard sizes and dimensions you need for a variety of applications.

Green builders appreciate the way iLevel leads the industry in using wood from forests managed to sustainable forestry standards and making the most of each tree. All of our North American forests and a majority of our wood products are third-party certified by strict standards under the Sustainable Forestry Initiative (SFI) or the Canadian Standards Association (CSA).

iLevel Framer Series Lumber is trouble-free when we deliver it, and stays trouble-free while you frame it, while you sell it, and while the homeowners are enjoying it later. When you can get the best, why settle for standard?

iLEVEL® PERFORMANCE-TESTED FRAMER SERIES® LUMBER BENEFITS

- **Predictable performance—less guesswork**
- **Reduces callbacks**
- **Enhanced design flexibility**
- **No more field culling**
- **Saves labor**
- **Reduces jobsite framing waste**
- **Streamlines underlayment installation**
- **Mold inhibitor helps material stay clean and bright, reducing product loss and callbacks**
